Know Your VCS-279 Certification Well:

The VCS-279 is best suitable for candidates who want to gain knowledge in the Veritas NetBackup. Before you start your VCS-279 preparation you may struggle to get all the crucial NetBackup and NetBackup Appliances Administration materials like VCS-279 syllabus, sample questions, study guide.

But don't worry the VCS-279 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-
- What is in the VCS-279 syllabus?
- How many questions are there in the VCS-279 exam?
- Which Practice test would help me to pass the VCS-279 exam at the first attempt?

Passing the VCS-279 exam makes you Veritas Certified Specialist (VCS) - NetBackup and NetBackup Appliances. Having the NetBackup and NetBackup Appliances Administration certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

Veritas VCS-279 NetBackup and NetBackup Appliances Administration Certification Details:

Exam Name	Veritas Certified Specialist (VCS) - NetBackup and NetBackup Appliances
Exam Code	VCS-279
Exam Price	$225 (USD)
Duration	105 mins
Number of Questions	80 - 90
Passing Score	65%
Schedule Exam	**Pearson VUE**
Sample Questions	**Veritas NetBackup and NetBackup Appliances Administration Sample Questions**
Practice Exam	**Veritas VCS-279 Certification Practice Exam**

VCS-279 Syllabus:

Topic	Details
Configure NetBackup 8.1.2 and NetBackup Appliances 3.1.2	- Describe how to configure various master/media/client settings and host properties using the NetBackup administration console. - Describe how to configure removable media (tape), volume pools, volume groups, and media manager storage units. - Describe how to configure disk and cloud storage, storage units, and storage unit groups. - Describe how to configure and utilize backup policies. - Explain how to implement specialized backup solutions including synthetic backups, True Image Restore (TIR), multiple data streams, checkpoint restart, and the use of backup duplication solutions such as disk staging, Storage Lifecycle Policies, Auto Image Replication, and NetBackup Accelerator. - Describe the function, uses, configuration, and administration of the NetBackup deduplication options, such as media server deduplication, client-side deduplication, optimized duplication, and storage servers. - Describe how to perform catalog backup configuration tasks. - Describe how to configure appliances through Appliance Shell Menu (CLISH) and Appliance Web Console.
Monitor and Maintain NetBackup 8.1.2 and NetBackup Appliances 3.1.2	- Describe how to manage tape devices and tape media. - Describe image management concepts and how to use the NetBackup administration console to verify, expire, import, and manually duplicate backup images. - Describe how to manage NetBackup disk and cloud storage. - Interpret available reports to verify and monitor NetBackup. - Describe how and when to prioritize, cancel, suspend, resume, restart, retry or manually run backup and duplication jobs. - Describe how to initiate, prioritize, and monitor NetBackup restore jobs. - Describe how to manage NetBackup Security (e.g., RBAC, host certificates). - Describe how to install client updates (e.g., VxUpdate). - Describe how to interact with NetBackup on appliances. - Describe how to manage NetBackup Appliances using Appliance Shell Menu (CLISH) and Appliance Web Console. - Describe how to obtain and install NetBackup Appliance updates and EEBs using Appliance Shell Menu (CLISH), Appliance Management Server (AMS), and Appliance Web Console. - Monitor NetBackup Appliances

Topic	Details
Tune NetBackup 8.1.2 and NetBackup Appliances 3.1.2	- Analyze, optimize, and tune NetBackup. - Analyze, optimize, and tune NetBackup Appliances using Appliance Shell Menu (CLISH) and Appliance Web Console.
Troubleshoot NetBackup 8.1.2 and NetBackup Appliances 3.1.2	- Interpret status codes and job details in order to diagnose and troubleshoot failed jobs. - Troubleshoot devices and media, including connectivity between master, media, and client. - Troubleshoot common issues related to NetBackup disaster recovery including recovering the NetBackup catalog. - Troubleshoot basic NetBackup Appliance issues.

Veritas VCS-279 Sample Questions:

Question: 1

A job fails with the following message:
Error bpbrm (pid=5942) Cannot connect to winclient.example.com
Info bpbkar (pid=0) done. status: 58: can't connect to client
The administrator verifies the default OS host name resolution order is in place in all the environments, but finds an incorrect entry for the client in the media server's hosts file and corrects it.
The hosts file on the client is properly configured. The administrator restarts the job, but the job fails with the same error message.
Which action should the administrator perform to ensure the job completes successfully?

a) restart the NetBackup services on the master server
b) create a DNS record for the client
c) run bpclntcmd -clear_host_cache command on the media server
d) restart the NetBackup services on the client

Answer: c

Question: 2

An administrator configures storage units STU-A and STU-B into a storage unit group in Failover mode. If STU-A is busy, what happens to a new job going to the storage unit group?

a) queues and waits for STU-A to become available
b) queues and then initiates job to STU-B
c) fails over and writes backups to STU-B
d) fails with a status code 219: Required storage unit is unavailable

Answer: a

Question: 3

An administrator of a multi-site, multi-domain NetBackup environment wants to be able to provide redundancy for backups as well as protecting the NetBackup image database. All backups must have on-site and off-site copies in multiple NetBackup domains as well as off-site tape copies.

Which NetBackup feature should the administrator use to implement the functionality?

a) Replication Director
b) Auto Image Replication
c) Optimized Duplication
d) Vault with Catalog Backups

Answer: b

Question: 4

The nbemmcmd -getemmserver command on a new NetBackup media server produces the error displayed below. Failed to initialize EMM connection.

Which two steps are used to diagnose the issue?

(Select two.)

a) remove the media server name from the additional servers list on the master serve
b) run the bpclntcmd -hn command on the master server to confirm that the master server was able to resolve its own hostname
c) telnet from the master server to the media server's VNETD port
d) verify that network access to the master server is available
e) verify that the nbemm and pbx_exchange daemons/services are running on the master server

Answer: d, e

Question: 5

The NetBackup Resource Broker (NBRB) maintains resource requests for jobs that are queued. Which two criteria does NBRB use to evaluate the resource requests and provide resources to each job sequentially?

(Select two.)

a) job priority
b) date of last successful backup
c) data classification rank ID
d) time when NBRB receives the request
e) retention level

Answer: a, d

Question: 6

Consider the configuration information for a single UNIX client displayed below.

Allow Multiple Data Streams is enabled.
ALL_LOCAL_DRIVES is specified.
Media multiplexing is set to 6.
Three tape drives are available in the storage unit and multiplex per drive is 2.
Max Jobs per Client is set to 8.
The client has five local file systems with no exclude list

How many concurrent data streams will there be when the policy runs?

a) two
b) three
c) five
d) six
e) eight

Answer: c

Question: 7

Which two pools are created by default in NetBackup?

(Select two.)

a) Scratch pool
b) CatalogBackup pool
c) DataStore pool
d) Deduplication pool
e) Default pool

Answer: b, c

Question: 8

An administrator must recover an expired image from a tape where only one remaining copy exists and there are other unexpired images on the tape.

How should the administrator locate the tape which contains the image?

a) run the Tape Contents report
b) run the Images on Tape report
c) run the Tape Summary report
d) run the Images on Media report

Answer: a

Question: 9

Which two media status designations are excluded in the count against maximum number of partially full media?

(Select two.)

a) Frozen
b) Imported
c) Active
d) Multi-Retlev
e) MPX

Answer: a, b

Question: 10

Which two catalog components contain information on what has been backed up and its metadata in NetBackup?

(Select two.)

a) Media
b) Image
c) Volume
d) NBDB
e) Class

Answer: b, d

Study Guide to Crack Veritas NetBackup and NetBackup Appliances Administration VCS-279 Exam:

- Getting details of the VCS-279 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the VCS-279 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the Veritas provided training for VCS-279 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the VCS-279 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on VCS-279 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

Reliable Online Practice Test for VCS-279 Certification

Make EduSum.com your best friend during your Administration of Veritas NetBackup 8.1.2 and NetBackup Appliances 3.1.2 exam preparation. We provide authentic practice tests for the VCS-279 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual VCS-279 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the VCS-279 exam.
