

## **CWNP CWS-101**

**CWNP Wi-Fi Specialist Certification Questions & Answers** 

Exam Summary – Syllabus – Questions

CWS-101

**CWNP Certified Wireless Specialist** 60 Questions Exam – 70% Cut Score – Duration of 90 minutes

## **Table of Contents:**

Know Your CWS-101 Certification Well:	.2
CWNP CWS-101 Wi-Fi Specialist Certification Details:	.2
CWS-101 Syllabus:	.3
Understand Basic RF Characteristics (15%) Identify Wireless Networking Features and Functions (30%) Identify Wireless Hardware and Software (30%) Understand Organizational Goals (25%) CWNP CWS-101 Sample Questions:	3 4 4
Study Guide to Crack CWNP Wi-Fi Specialist CWS-101 Exam:	.8

## Know Your CWS-101 Certification Well:

The CWS-101 is best suitable for candidates who want to gain knowledge in the CWNP Wireless Network. Before you start your CWS-101 preparation you may struggle to get all the crucial Wi-Fi Specialist materials like CWS-101 syllabus, sample questions, study guide.

But don't worry the CWS-101 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-

- What is in the CWS-101 syllabus?
- How many questions are there in the CWS-101 exam?
- Which Practice test would help me to pass the CWS-101 exam at the first attempt?

Passing the CWS-101 exam makes you CWNP Certified Wireless Specialist. Having the Wi-Fi Specialist certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

Exam Name	Wireless Specialist
Exam Code	CWS-101
Exam Price	\$150 USD
Duration	90 minutes
Number of Questions	60
Passing Score	70%
Recommended Training	Live Training Class Self-Paced Training Kit Study and Reference Guide Electronic Practice Test eLearning Modules eLearning Bundle
Exam Registration	PEARSON VUE

## CWNP CWS-101 Wi-Fi Specialist Certification Details:

Sample Questions	CWNP CWS-101 Sample Questions
Practice Exam	<b>CWNP Certified Wireless Specialist Practice Test</b>

## CWS-101 Syllabus:

Section	Objectives	
Understand Basic RF Characteristics (15%)		
Identify RF characteristics	- RF waves - Amplitude - Frequency - Wavelength - Reflection	
Explain basic RF behaviors	- Absorption - Signal strength	
Understand antenna types	- Omnidirectional - Semi-directional - Highly directional - Internal vs. external	
Identify Wireles	s Networking Features and Functions (30%)	
Know the frequency bands used by common wireless protocols	- Sub-1 GHz - 2.4 GHz - 5 GHz - 6 GHz - Above 7 GHz	
Identify Physical Layer (PHY) characteristics Select appropriate channels	<ul> <li>Data rates</li> <li>Channel widths and center frequencies</li> <li>Channel selection best practices</li> <li>Common channel selection mistakes</li> </ul>	
Identify factors impacting wireless network performance	<ul> <li>Coverage or link requirements</li> <li>Capacity requirements</li> <li>Required features</li> <li>Poor configuration and implementation</li> </ul>	
Explain the basic security solutions used	<ul> <li>Authentication and key management</li> <li>Encryption</li> </ul>	

Section	Objectives	
Identify Wireless Hardware and Software (30%)		
Identify APs, coordinators, gateways, and controller features and capabilities	<ul> <li>Routing</li> <li>Security</li> <li>Network management</li> <li>Connection interfaces</li> <li>Device management solutions</li> <li>Internal and external antennas</li> <li>PoE support</li> </ul>	
Describe wireless network management systems	- Autonomous - Controller - Cloud - Custom or third-party management systems	
Determine capabilities of network client or IoT devices	<ul> <li>Protocol support</li> <li>Power provisioning</li> <li>Sensor support</li> <li>Security options</li> <li>Mobile vs. stationary</li> </ul>	
ldentify when Power over Ethernet (PoE) should be used		
Understand the basic requirements for voice over wireless networks Determine the best solution	- Latency - Jitter - Signal strength - User provisioning	
for BYOD and guest access in wireless LANs	- Captive portals - Device and software control solutions	
Understand Organizational Goals (25%)		
Understand issues in common vertical markets	<ul> <li>Standard Enterprise Offices</li> <li>Healthcare</li> <li>Hospitality</li> <li>Conference Centers</li> <li>Education</li> <li>Government</li> <li>Retail</li> <li>Industrial</li> <li>Emergency Response</li> </ul>	

Section	Objectives
	- Temporary Deployments
	- Small Office/Home Office (SOHO)
	- Public Wi-Fi
	- Network diagrams
	- Wi-Fi implementations
Identify information sources	<ul> <li>IoT network implementations</li> </ul>
related to existing networks	- Neighbor networks
	- Available network services
	- PoE availability
Discover coverage/link and	- Define coverage areas
capacity needs from a	- Define capacity zones
functional perspective	- Define link requirements
	- Laptops, tablets, mobile phones, desktops, and specialty
	devices
	- Real-time applications
Discover client devices, IoT	- Standard applications (e-mail, web browsing, database
devices, and applications in	access, etc.)
use	- Data-intensive applications (file downloads/uploads,
	cloud storage, cloud backup, etc.)
	- IoT sensors
	- IoT actuators
Determine the need for	- Bridge link distance and required throughput
outdoor coverage networks,	- Outdoor areas requiring coverage
outdoor IoT connections, and	- Use cases for outdoor access
bridge links	<ul> <li>Outdoor IoT connectivity options</li> </ul>
	- Regulatory
Define security constraints	<ul> <li>Industry standards and guidelines</li> </ul>
	- Organizational policies
	- Authorized users
Discover use cases and	- Onboarded guest access
access types	- Public Wi-Fi
	<ul> <li>Monitoring and control (IoT devices)</li> </ul>
Match organizational goals to	
wireless network features	
and functions	

## **CWNP CWS-101 Sample Questions:**

#### Question: 1

What must be defined in order to properly determine capacity requirements?

- a) Number of devices alone
- b) Number of devices and application characteristics
- c) Firmware version on neighboring network APs
- d) Application characteristics alone

#### Answer: b

#### Question: 2

A tablet is a single stream client with one radio and one antenna. What 802.11 features is definitely not supported on this device?

- a) MIMO (Multiple-Input/Multiple-Output)
- b) DRS (Dynamic Rate Switching)
- c) Authentication
- d) Association

#### Answer: a

#### Question: 3

RF waves are comprised of what two fields?

- a) Electric and magnetic
- b) Frequency and wavelength
- c) Phase and amplitude
- d) Phase and frequency

Answer: a

#### Question: 4

What is the maximum data rate of the original 802.11 standard DSSS PHY (Physical Layer)?

- a) 54 Mbps
- b) 1 Mbps
- c) 11 Mbps
- d) 2 Mbps

#### Answer: d

#### Question: 5

You have a switch supporting 802.3at and you must power an AP that is 40 meters from the switch. What can be used to provide power to the AP?

- a) Transmit Power Control (TCP)
- b) Radio Resource Management (RRM)
- c) Power over Ethernet (PoE)
- d) Quality of Service (QoS)

Answer: c

#### Question: 6

Where is an omnidirectional antenna typically placed for best results?

- a) Above the target coverage area
- b) The edge of the target coverage area
- c) Beneath the target coverage area
- d) The center of the target coverage area

#### Answer: d

#### Question: 7

When controller-based APs are used, where is the WLAN defined?

- a) In the controller
- b) In the master AP and it is then copied to all other APs
- c) In the first AP and it is then copied to all other APs
- d) In each individual AP

#### Answer: a

#### Question: 8

Which one of the following is an example of an antenna used mostly for bridge links?

- a) Panel
- b) Omnidirectional
- c) Parabolic dish
- d) Patch

#### Answer: c

#### Question: 9

In what frequency band does an 802.11g (ERP) device operate?

- a) 60 GHz
- b) 2.4 GHz
- c) 5 GHz
- d) Sub-1 GHz

Answer: b

Question: 10

What kind of antenna is most frequently used with indoor APs?

- a) Grid
- b) Parabolic dish
- c) Internal
- d) Yagi

Answer: c

# Study Guide to Crack CWNP Wi-Fi Specialist CWS-101 Exam:

- Getting details of the CWS-101 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the CWS-101 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the CWNP provided training for CWS-101 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the CWS-101 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.

• Practicing on CWS-101 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

### **Reliable Online Practice Test for CWS-101 Certification**

Make NWExam.com your best friend during your Wireless Specialist exam preparation. We provide authentic practice tests for the CWS-101 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual CWS-101 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the CWS-101 exam.
