## Know Your MB-700 Certification Well:

The MB-700 is best suitable for candidates who want to gain knowledge in the Microsoft Dynamics 365. Before you start your MB-700 preparation you may struggle to get all the crucial Finance and Operations Apps Solution Architect materials like MB-700 syllabus, sample questions, study guide.

But don't worry the MB-700 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all your queries like-

- What is in the MB-700 syllabus?
- How many questions are there in the MB-700 exam?
- Which Practice test would help me to pass the MB-700 exam at the first attempt?

Passing the MB-700 exam makes you Microsoft Certified - Dynamics 365 Finance and Operations Apps Solution Architect Expert. Having the Finance and Operations Apps Solution Architect certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

## Microsoft MB-700 Finance and Operations Apps Solution Architect Certification Details:

Exam Name	Microsoft Certified - Dynamics 365 Finance and Operations Apps Solution Architect Expert
Exam Code	MB-700
Exam Price	\$165 (USD)
Duration	120 mins
Number of Questions	40-60
Passing Score	700 / 1000
Books / Training	<a href="#">Course MB-700T00: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect</a>
Schedule Exam	<a href="#">Pearson VUE</a>
Sample Questions	<a href="#">Microsoft Finance and Operations Apps Solution Architect Sample Questions</a>
Practice Exam	<a href="#"><b>Microsoft MB-700 Certification Practice Exam</b></a>

## MB-700 Syllabus:

Topic	Details
<b>Architect solutions (25-30%)</b>	
Gather requirements	<ul style="list-style-type: none"> <li>- identify operational and organizational challenges that impact a business</li> <li>- identify existing business processes and opportunities to optimize business processes</li> <li>- gather information about expected transaction volume</li> <li>- categorize business requirements and perform gap fit analyses</li> <li>- review and validate business requirements throughout the solution lifecycle</li> </ul>
Define the solution architecture	<ul style="list-style-type: none"> <li>- map business requirements to functional components</li> <li>- evaluate whether to build versus buy for selected business requirements</li> <li>- identify opportunities to integrate other Microsoft technologies</li> <li>- select solution design patterns</li> <li>- select the appropriate tools to fulfill customer requirements</li> </ul>
Describe and document the solution blueprint	<ul style="list-style-type: none"> <li>- define an organization and organization locations including intercompany information</li> <li>- document the implementation timeline including roll-out strategies</li> <li>- define the business process catalog and document solution gaps</li> <li>- define instances, environments, and solution components</li> <li>- develop a disaster recovery strategy</li> <li>- identify required integration and interface details</li> <li>- define required business intelligence and reporting components</li> <li>- identify required security roles</li> </ul>
<b>Define solution strategies (25-30%)</b>	
Select a deployment strategy	<ul style="list-style-type: none"> <li>- develop a change management and adoption process</li> <li>- select a deployment model and identify instances and environments required for the selected deployment model</li> </ul>

Topic	Details
	<ul style="list-style-type: none"> <li>- describe the Dynamics 365 One Version strategy and the effects of One Version on solutions</li> <li>- segment solution development and delivery into logical phases</li> <li>- provide alternative methodologies and approaches for deploying modifications</li> <li>- determine solution maintenance cadence and timelines</li> <li>- identify upgrade scenarios and select appropriate tools</li> <li>- understanding success by design aspects</li> </ul>
Define an application lifecycle management (ALM) strategy	<ul style="list-style-type: none"> <li>- define a code management and data flow strategy</li> <li>- define a Power Platform solution management strategy</li> <li>- determine which build automation capabilities to implement</li> <li>- define a roll-back strategy for Finance and Operations apps and Power Platform solutions</li> </ul>
Determine a data management strategy	<ul style="list-style-type: none"> <li>- differentiate between transactional and historical data</li> <li>- define data quality and data validation process</li> <li>- define data cleansing and transformation strategies</li> <li>- define data dependencies</li> <li>- develop a data migration strategy for master, transactional, reference, parameter, and document data entities</li> <li>- develop data cut-over and data retention plans</li> </ul>
Define the security architecture	<ul style="list-style-type: none"> <li>- differentiate between Azure, Dynamics 365, and infrastructure security</li> <li>- describe Azure and infrastructure security-related elements</li> <li>- describe use cases for and capabilities of record-level and role-based security in Dynamics 365</li> </ul>
<b>Manage implementations (25-30%)</b>	
Describe Lifecycle Services (LCS) tools	<ul style="list-style-type: none"> <li>- understand the use cases and capabilities of different LCS tools</li> <li>- understand the use cases and capabilities Business Process Modeler (BPM)</li> <li>- understand the use cases and capabilities LCS Methodologies</li> <li>- create a usage profile to describe current or projected usage</li> <li>- describe uses cases and capabilities for LCS downloadable tools</li> </ul>

Topic	Details
Manage interactions with FastTrack	<ul style="list-style-type: none"> <li>- identify the value proposition for FastTrack</li> <li>- identify FastTrack engagement types and personnel roles</li> <li>- describe typical FastTrack workshop scoping and the inputs for each workshop</li> <li>- describe go-live checklist elements</li> </ul>
Determine support options	<ul style="list-style-type: none"> <li>- develop a support plan and strategy</li> <li>- define post-go-live support plans including response times and service-level agreements (SLAs)</li> <li>- describe use cases and capabilities for the LCS Support tool</li> </ul>
Determine licensing requirements	<ul style="list-style-type: none"> <li>- determine the types of licenses required</li> <li>- estimate the number of licenses required by using the License Sizing estimator</li> <li>- describe the process for estimating ongoing software licensing costs</li> </ul>
<b>Manage testing (10-15%)</b>	
Define a testing strategy	<ul style="list-style-type: none"> <li>- define a regression testing strategy</li> <li>- identify opportunities for automated testing</li> <li>- review use cases and test coverage for all scenarios</li> <li>- determine when to use RSAT versus SysTest framework versus Postman versus ATL and other tools</li> </ul>
Define a performance testing strategy	<ul style="list-style-type: none"> <li>- define performance goals and requirements</li> <li>- identify performance monitoring and testing tools</li> <li>- define performance benchmarks and success criteria</li> <li>- design a performance and load testing strategy</li> <li>- troubleshoot performance issues</li> </ul>

## Microsoft MB-700 Sample Questions:

**Question: 1**

You need to recommend an appropriate implementation methodology. Which methodology should you recommend?

- a) Spiral
- b) Lean
- c) Waterfall
- d) Agile

**Answer: d**

**Question: 2**

You are planning to implement Dynamics 365 Finance. Accountants in your organization need to be able to enter multiple lines into payment journals. You need to recommend a tool for expediting data entry. What should you recommend?

- a) Use the desktop version of Microsoft Excel to use the Excel Data Connector app.
- b) Use Microsoft Excel online to use the Excel Data Connector app.
- c) Use an aggregate data entity to expose data to the Microsoft Excel Data Connector app.
- d) Use the Data migration tool.

**Answer: a****Question: 3**

You need to recommend a solution for tracking business process test steps. What should you recommend?

- a) Data Migration Framework
- b) Microsoft Azure DevOps
- c) Microsoft SharePoint
- d) Selenium Automation Framework

**Answer: b****Question: 4**

You need to manage the roles and responsibilities for security and financial management to address concerns found in the prior year's audit. What should you do?

- a) Use security roles with segregation of duties.
- b) Implement a security group for all users in finance department
- c) Use security roles with audit workbench.
- d) Grant multiple security roles per user.

**Answer: a**

**Question: 5**

A client has a third-party warehouse management system. Data from the system must be integrated with Dynamics 365 Finance in near real-time. You need to determine an integration solution. Which two solutions should you recommend?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- a) OData
- b) Batch data API processed daily
- c) Data management
- d) Business events

**Answer: a, d**

**Question: 6**

A company implements Dynamics 365 for Finance and Operations. You have a requirement that the component data for address structure in the system be available in Portuguese (Brazil). You need to provide address and contact information purpose with translation. What should you do?

- a) Under Organization administration, on the Global addresses tab, enter the appropriate translation value in the translations form
- b) In User options, set the language preference to Portuguese pt-BR and enter addresses for customers and vendors
- c) Upload files to Dynamics 365 Translation Services (DTS) for conversion
- d) Apply return from Dynamics 365 Translation Services (DTS) to the system by submitting a support ticket

**Answer: a**

**Question: 7**

A company is implementing a new Dynamics 365 cloud deployment. The stakeholders need to confirm that performance testing meets their expectations. The single-user rest procure-to-pay scenario is complete.

You need to successfully complete the multi-user load test. Which tool should you recommend?

- a) Microsoft Azure DevOps
- b) Microsoft Dynamics Lifecycle Services
- c) PerfSDK
- d) Visual Studio

**Answer: c**

**Question: 8**

A local bookstore plans to offer online ordering with in-store pickup by using a third-party e-commerce site. Credit card authorizations are required for online sales.

You need to recommend options to ensure that customers who place online orders are not charged until the merchandise is picked up in the store.

What are three possible ways to achieve this goal?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- a) Pass a credit card token from Dynamics 365 Retail POS to e-commerce.
- b) Pass sales data from e-commerce to Dynamics 365 Finance.
- c) Configure Dynamics 365 Finance and Dynamics 365 Retail.
- d) Replace e-commerce with a link to Dynamics 365 Retail POS so users can enter their own credit card data.
- e) Pass a credit card token from e-commerce to Dynamics 365 Retail POS.

**Answer: b, c, e**

**Question: 9**

You need to recommend a solution to manage the wine bottle label requirements for the private brand. What should you recommend?

- a) Recommend Dynamics 365 Retail.
- b) Create notes on the item and print for the customers.
- c) Use an add-on solution for barcode and label report printing.
- d) Implement Advanced Warehouse label printing.

**Answer: c**

**Question: 10**

You need to ensure that the customer records remain synchronized in both systems. What should you recommend?

- a) Write a Power BI report.
- b) Integrate the third-party application into Dynamics 365 Finance
- c) Replace the sales system with Dynamics 365 Sales.
- d) Use Microsoft Power Automate

**Answer: b**

## Study Guide to Crack Microsoft Finance and Operations Apps Solution Architect MB-700 Exam:

- Getting details of the MB-700 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the MB-700 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the Microsoft provided training for MB-700 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the MB-700 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on MB-700 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

### Reliable Online Practice Test for MB-700 Certification

Make EduSum.com your best friend during your Microsoft Dynamics 365 Finance and Operations Apps Solution Architect exam preparation. We provide authentic practice tests for the MB-700 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual MB-700 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the MB-700 exam.
