Microsoft PL-900 Microsoft Power Platform Fundamentals Certification Details:

Exam Name	Microsoft Certified - Power Platform Fundamentals
Exam Code	PL-900
Exam Price	\$99 (USD)
Duration	60 mins
Number of Questions	40-60
Passing Score	700 / 1000
Books / Training	PL-900T00-A: Microsoft Power Platform Fundamentals
Schedule Exam	Pearson VUE
Sample Questions	Microsoft Power Platform Fundamentals Sample Questions
Practice Exam	Microsoft PL-900 Certification Practice Exam

PL-900 Syllabus:

Topic	Details
Describe the business value of Microsoft Power Platform (20-25%)	
Describe the business value of	<ul style="list-style-type: none"> - Gain insights into data by using Power BI - Build applications quickly by using Power Apps

Topic	Details
Microsoft Power Platform services	<ul style="list-style-type: none"> - Automate processes by using Power Automate - use connectors to access services and data - create powerful chatbots by using the Power Virtual Agents web app and Power Virtual Agents in Microsoft Teams
Describe the business value of extending business solutions by using Microsoft Power Platform	<ul style="list-style-type: none"> - describe how Microsoft Power Platform apps work together with Dynamics 365 apps - describe how Microsoft Power Platform business solutions can be used by Microsoft 365 apps and services - describe how to use Microsoft Power Platform solutions with Microsoft Teams - describe how Microsoft Power Platform business solutions can consume Microsoft Azure services including Azure Cognitive Services - describe how Microsoft Power Platform business solutions can consume third-party apps and services - describe use cases for AppSource - describe how Microsoft Power Platform apps work together
Describe Microsoft Power Platform administration and security	<ul style="list-style-type: none"> - describe how Microsoft Power Platform implements security including awareness of Microsoft Dataverse security roles, Azure Identity Services, and Access Management (IAM) - describe how to manage apps and users - describe environments - describe where to perform specific administrative tasks including Microsoft Power Platform Admin center and Microsoft 365 admin center - describe data policies - describe how Microsoft Power Platform supports privacy and accessibility guidelines - describe Microsoft Power Platform privacy and accessibility capabilities - describe Microsoft Power Platform governance capabilities

Topic	Details
Identify the Core Components of Microsoft Power Platform (10-15%)	
Describe Microsoft Dataverse	<ul style="list-style-type: none"> - describe the difference between databases and Dataverse - describe the differences between Dataverse and Dataverse for Teams - describe tables, columns, and relationships - describe how to use common standard tables to describe people, places, and things
Describe Connectors	<ul style="list-style-type: none"> - describe triggers including trigger types and where triggers are used - describe actions - describe licensing options for connectors including standard or premium tier Identify use cases for custom connectors
Describe AI Builder	<ul style="list-style-type: none"> - identify the business value of AI Builder - describe models including business card reader, detection model, form processing model, and prediction model - describe how the Power Apps and Power Automate can consume AI Builder data
Demonstrate the capabilities of Power BI (20-25%)	
Identify common Power BI components	<ul style="list-style-type: none"> - identify and describe uses for visualization controls including pie, bar, donut, and scatter plots and KPIs - describe the Power BI Desktop Reports, Data, and Model tabs - compare and contrast Power BI Desktop and Power BI Service - compare and contrast dashboards, workspaces, and reports - describe the Power BI security model
Connect to and consume data	<ul style="list-style-type: none"> - connect to and combine data from multiple sources including Microsoft Excel - describe how to use Power Query to clean and transform data - describe and implement aggregate functions

Topic	Details
	<ul style="list-style-type: none"> - identify available types of data sources including Microsoft Excel - describe use cases for shared datasets - describe use cases for template apps - describe options for viewing Power BI reports and dashboards
Build a basic dashboard using Power BI	<ul style="list-style-type: none"> - create a Power BI report - create a Power BI dashboard - publish and share reports and dashboards
Demonstrate the capabilities of Power Apps (25-30%)	
Identify common Power Apps components	<ul style="list-style-type: none"> - describe differences between canvas apps and model-driven apps - describe use cases for formulas
Build a basic canvas app	<ul style="list-style-type: none"> - describe types of data sources - connect to data by using connectors - create an app from data - use controls to design the user experience - publish and share an app
Build a basic model-driven app	<ul style="list-style-type: none"> - create a model-driven app from tables - modify forms - create and modify views - publish and share an app
Demonstrate the capabilities of Power Automate (10-15%)	
Identify common Power Automate components	<ul style="list-style-type: none"> - identify flow types including cloud, desktop, and business process flows - describe use cases for flows and available flow templates - describe how Power Automate uses connector triggers and actions - describe loops and conditions including switch, do until, and apply to each - describe expressions - describe use cases for approvals - describe the Power Automate apps, including Power

Topic	Details
	Automate Desktop, Power Automate mobile, and Power Automate portal
Build a basic cloud flow	<ul style="list-style-type: none"> - create a flow by using an instant, automated, or scheduled flow template - modify a cloud flow - use flow controls to perform data operations - run a cloud flow
Demonstrate the capabilities of Power Virtual Agents (5-10%)	
Describe the capabilities of Power Virtual Agents in Microsoft Teams	<ul style="list-style-type: none"> - describe use cases for Power Virtual Agents within Microsoft Teams - describe topics, entities and actions - describe message nodes, question nodes, conditions, trigger phrases, and the authoring canvas
Build and publish a basic chatbot	<ul style="list-style-type: none"> - create a chatbot - create a topic - call an action - launch a Power Automate flow from a chatbot - publish a chatbot

Broaden Your Knowledge with Microsoft PL-900 Sample Questions:

Question: 1

Your company has an on premises Microsoft SQL Server database that contains legacy sales data. You must display information from the database in a new Power Apps app.

You need to establish a secure connection between the database and the app. What should you use?

- a) Data source
- b) App
- c) Gateway
- d) Flow

Answer: c

Question: 2

Users within a company use Flow for personal productivity. Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.

You need to ensure that users can revert a flow to the current state. Which two options can you use?

Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- a) Export
- b) Rename
- c) Save As
- d) Share

Answer: a, c

Question: 3

A company has a Power Apps app that is used by most employees. The company is expanding to other countries/regions. You need to recommend a solution to translate text generated within the Power Apps in near real-time.

What should you recommend?

- a) Microsoft Azure Synapse Analytics
- b) Microsoft Azure Cognitive Services
- c) Common Data Service connector
- d) Power BI

Answer: b

Question: 4

You are the Power Platform administrator in your company. You want to create new users and manage their license assignment. You need to use the appropriate admin center to perform these tasks. What should you use?

- a) Dynamics 365 admin center
- b) Power Apps admin center
- c) Power Platform admin center
- d) Microsoft 365 admin center

Answer: d

Question: 5

The Common Data Model (CDM) is a standard and extensible collection of schemas, including entities, attributes and relationships that represents business concepts and activities with well-defined semantics.

It consists of a set of standardized, extensible data schemas published by Microsoft and partners to facilitate data interoperability.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- a) Common Data Services (CDS)
- b) Dynamics 365 Business Central
- c) Business process flow
- d) No change is needed.

Answer: d

Question: 6

A company has a website. The website includes a form that allows the company to collect information about leads. You need to set up an automated workflow to create leads in Dynamics 365 Sales when leads are created on the company's custom website.

What should you create?

- a) Task Flow
- b) Power Automate flow
- c) Dynamics 365 workflow
- d) Business Process Flow

Answer: b

Question: 7

Your company uses Dynamics 365. When a service ticket is created, a technician visit to the customer is required. Technician visits should be consented to by a manager.

You need to ensure that the process is followed. What should you use?

- a) Scheduled flow
- b) Button flow
- c) Business rule
- d) Approval flow

Answer: d

Question: 8

You plan to use Power Automate to perform data-management tasks when users interact with sales opportunities in Dynamics 365. You need to identify the three types of events that can generate a trigger for the tasks.

Which three types of events should you identify?

Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- a) when a record is displayed in a view
- b) when a record is deleted
- c) when a record is created
- d) when a record is updated
- e) when a record is read

Answer: b, c, d

Question: 9

Customer-facing applications must comply with Global Data Protection Regulations (GDPR). You need to recommend actions to help ensure GDPR compliance.

Which two features should the company use?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- a) Force a user to update security questions after a specific amount of time.
- b) Prompt a user for consent to use their personal data and record the date consented.
- c) Block users who are identified as minors.
- d) Automatically deactivate a user who has not used the portal in six months.

Answer: b, c

Question: 10

What is a benefit of deploying Microsoft 365 and Dynamics 365 apps in the same tenant?

- a) You do not need to manually back up data.
- b) Both will use the same time zone.
- c) You can use Power BI to display data that comes from both environments.
- d) You can implement Single Sign-On (SSO).

Answer: c

Avail the Study Guide to Pass Microsoft PL-900 Microsoft Power Platform Fundamentals Exam:

- Find out about the PL-900 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [PL-900 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the PL-900 training. Joining the Microsoft provided training for PL-900 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [PL-900 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. PL-900 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

- Passing the PL-900 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the PL-900 Certification

EduSum.Com is here with all the necessary details regarding the PL-900 exam. We provide authentic practice tests for the PL-900 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on EduSum.Com for rigorous, unlimited two-month attempts on the [PL-900 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Microsoft Certified - Power Platform Fundamentals.
