SSL Proxy	Identify concepts, general features, or functionality of SSL Proxy <ul style="list-style-type: none"> • Certificates • Client and server protection Demonstrate knowledge of how to configure, monitor, or troubleshoot SSL proxy
Juniper Secure Analytics (JSA)	Identify concepts, general features, or functionality of JSA <ul style="list-style-type: none"> • Logging • Analytics

Broaden Your Knowledge with Juniper JN0-334 Sample Questions:

Question: 1

What are three valid actions for a then statement in a security policy?

(Choose three.)

- a) reject
- b) discard
- c) accept
- d) deny
- e) permit

Answer: a, d, e

Question: 2

Which two statements are correct regarding reth interfaces?

(Choose two.)

- a) Child interfaces must be in the same slot on both nodes
- b) Child interfaces do not need to be in the same slot on both nodes.
- c) Child interfaces must be the same Ethernet interface type.
- d) Child interfaces can be a mixture of Ethernet interface types.

Answer: b, c

Question: 3

Which two are negotiated during Phase 2 of an IPsec VPN tunnel establishment?

(Choose two.)

- a) security protocol
- b) VPN monitor interval
- c) UDP port number
- d) proxy IDs

Answer: a, d

Question: 4

What is the default timeout for a TCP session on an SRX Series device?

- a) 1 minute
- b) 1 hour
- c) 30 seconds
- d) 30 minutes

Answer: d

Question: 5

At which step in the packet flow are Junos Screen checks applied?

- a) prior to the route lookup
- b) prior to security policy processing
- c) after ALG services are applied
- d) after source NAT services are applied

Answer: a

Question: 6

You need to implement Junos Screen options to protect traffic coming through the ge-0/0/0 and ge-0/0/1 interfaces which are located in the trust and DMZ zones, respectively. Where would you enable the Junos Screen options?

- a) in the trust and DMZ zone settings
- b) on the ge-0/0/0 and ge-0/0/1 interfaces
- c) in a security policy
- d) in the global security zone settings

Answer: a

Question: 7

You are building a VPN tunnel between two SRX Series devices. You want the tunnel to always be established, even if there is no traffic to send. Which action would be used to achieve this goal?

- a) Configure an RPM probe to constantly ping across the links.
- b) Configure vpn-monitor with the optimized parameter on the tunnel.
- c) Configure establish-tunnels with the immediately parameter.
- d) Configure the OSPF demand-circuit feature on the tunnel interface.

Answer: c

Question: 8

You have just configured source NAT with a pool of addresses within the same subnet as the egress interface. What else must be configured to make the addresses in the pool usable?

- a) static NAT
- b) destination NAT
- c) address persistence
- d) proxy ARP

Answer: d**Question: 9**

You want to show interface-specific zone information and statistics. Which operational command would be used to accomplish this?

- a) show security zones detail
- b) show interfaces ge-0/0/3.0
- c) show interfaces terse
- d) show interfaces ge-0/0/3.0 extensive

Answer: d**Question: 10**

You are asked to establish an IPsec VPN between two sites. You are also required to establish an OSPFv2 adjacency across this VPN.

- a) policy-based VPN
- b) protocol-based VPN
- c) destination-based VPN
- d) route-based VPN

Answer: d

Avail the Study Guide to Pass Juniper JN0-334 JNCIS Security Exam:

- Find out about the JN0-334 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [JN0-334 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.

- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the JN0-334 training. Joining the Juniper provided training for JN0-334 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [JN0-334 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. JN0-334 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

Passing the JN0-334 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the JN0-334 Certification

NWExam.com is here with all the necessary details regarding the JN0-334 exam. We provide authentic practice tests for the JN0-334 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on NWExam.com for rigorous, unlimited two-month attempts on the [JN0-334 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Juniper Networks Certified Specialist Security.
