## Discover More about the PL-100 Certification

Are you interested in passing the Microsoft PL-100 exam? First discover, who benefits from the PL-100 certification. The PL-100 is suitable for a candidate if he wants to learn about Power Platform. Passing the PL-100 exam earns you the Microsoft Certified - Power Platform App Maker Associate title.

While preparing for the PL-100 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The PL-100 PDF contains some of the most valuable preparation tips and the details and instant access to useful [PL-100 study materials just at one click](#).

## Microsoft PL-100 Power Platform App Maker Certification Details:

Exam Name	Microsoft Certified - Power Platform App Maker Associate
Exam Code	PL-100
Exam Price	\$165 (USD)
Duration	120 mins
Number of Questions	40-60
Passing Score	700 / 1000
Books / Training	<a href="#">Course PL-100T00: Microsoft Power Platform App Maker</a>
Schedule Exam	<a href="#">Pearson VUE</a>
Sample Questions	<a href="#">Microsoft Power Platform App Maker Sample Questions</a>
Practice Exam	<a href="#">Microsoft PL-100 Certification Practice Exam</a>

## PL-100 Syllabus:

Topic	Details
<b>Design business solutions (20-25%)</b>	
Create a high-level design	- Identify existing data sources needed to support a business solution

Topic	Details
	<ul style="list-style-type: none"> <li>- Describe the expected user experience for targeted devices and describe the differences between Microsoft Power Platform app types</li> <li>- Create a high-level structure for a new data source</li> </ul>
Identify Microsoft Power Platform components	<ul style="list-style-type: none"> <li>- Determine the required Power Apps app type for a business solution</li> <li>- Determine when to use Dataverse for Teams</li> <li>- Map a problem domain to Microsoft Power Platform tools</li> <li>- Identify options for implementing business logic</li> <li>- Describe connectors</li> <li>- Describe uses cases for cloud flows and desktop flows</li> <li>- Describe use cases for chatbots in Microsoft Teams</li> </ul>
Design the user interface (UI) for a business solution	<ul style="list-style-type: none"> <li>- Identify opportunities for component reuse</li> <li>- Select UI elements for canvas apps</li> <li>- Identify the model-driven forms and Microsoft Dataverse views that are needed</li> </ul>
Design reporting and visualizations for business solutions	<ul style="list-style-type: none"> <li>- Select reporting options for business solutions including views, Power BI visualizations, and dashboards</li> <li>- Define visualizations for Power BI dashboards</li> <li>- Define visualizations for model-driven dashboards</li> <li>- Define visualizations for canvas apps</li> </ul>
<b>Analyze and visualize data (10-15%)</b>	
Create and consume Power BI dashboards	<ul style="list-style-type: none"> <li>- Create a simple report from an existing dataset by using Power BI Service</li> <li>- Create Power BI dashboards from existing reports</li> <li>- Create and configure model-driven dashboards</li> <li>- Embed Power BI dashboards and tiles in canvas apps and model-driven apps</li> <li>- Share Power BI dashboards</li> </ul>
Describe AI Builder models	<ul style="list-style-type: none"> <li>- Describe use cases for AI Builder</li> <li>- Describe differences between prebuilt models and custom models</li> <li>- Describe the process for training custom models</li> <li>- Use a model from within Power Automate or Power Apps</li> </ul>

Topic	Details
<b>Create business solutions (60-65%)</b>	
Manage Microsoft Power Platform components during development	<ul style="list-style-type: none"> <li>- Create a Dataverse solution</li> <li>- Import a Dataverse solution</li> <li>- Import or export a canvas app or a cloud flow</li> <li>- Add existing apps and flows to a Dataverse solution</li> </ul>
Create model-driven apps	<ul style="list-style-type: none"> <li>- Compose model-driven apps</li> <li>- Create and configure Dataverse table forms</li> <li>- Create and configure Dataverse table views</li> <li>- Share model-driven apps with other users and groups</li> <li>- Create and configure model-driven dashboards</li> </ul>
Create and manage canvas apps	<ul style="list-style-type: none"> <li>- Connect to data sources in canvas apps</li> <li>- Interpret App Checker results</li> <li>- Manage versions of canvas apps</li> <li>- Publish canvas apps</li> <li>- Share canvas apps with other users and groups</li> <li>- Build canvas apps screens</li> <li>- Add canvas app assets and components to screens</li> </ul>
Create screens for canvas apps	<ul style="list-style-type: none"> <li>- Determine when to use forms, galleries, button, labels, input controls, images, and custom controls</li> <li>- Configure UI elements</li> <li>- Implement Power Fx formulas</li> <li>- Implement collections and variables</li> <li>- Run a Power Automate flow from a canvas app</li> </ul>
Configure Microsoft Dataverse	<ul style="list-style-type: none"> <li>- Create tables and table columns based on a data model</li> <li>- Link tables by using lookups</li> <li>- Describe use cases and capabilities of business rules</li> <li>- Create Dataverse business rules</li> <li>- Describe how Dataverse uses role-based access control (RBAC)</li> <li>- Add table permissions to existing Dataverse security roles</li> </ul>
Create Power Automate flows	<ul style="list-style-type: none"> <li>- Describe types of triggers for cloud flows</li> <li>- Create cloud flows</li> <li>- Configure triggers for cloud flows</li> <li>- Configure flow steps</li> </ul>

Topic	Details
	<ul style="list-style-type: none"> <li>- Test a cloud flow</li> <li>- Implement conditional logic for a cloud flow</li> <li>- Create approvals and monitor the approval process by using Power Automate and Microsoft Teams</li> <li>- Share cloud flows</li> <li>- Create a desktop flow for personal use</li> </ul>
Create Power Virtual Agents chatbots in Microsoft Teams	<ul style="list-style-type: none"> <li>- Identify use cases and capabilities for chatbots</li> <li>- Create a chatbot that uses topics and trigger phrases</li> <li>- Test a chatbot</li> <li>- Publish a chatbot</li> </ul>

## Broaden Your Knowledge with Microsoft PL-100 Sample Questions:

### Question: 1

You are employed as an app maker. You are required to construct a canvas app that allows for detailed data to be identified in targeted text.

Which of the following is the AI Model you should include in your app?

- a) A Business card reader model.
- b) A Category classification model.
- c) A Key Phrase Extraction model.
- d) An Entity Extraction model.

**Answer: d**

### Question: 2

You create a Power Platform solution. Solution data is stored in a variety of documented cloud services. You need to configure the data sources. What should you do?

- a) Create a data gateway.
- b) Add metadata to standard entities.
- c) Create a custom data connector.
- d) Use a content pack.

**Answer: b**

**Question: 3**

You are creating a multi-page canvas app that loads tabular data from an external data source. Once loaded, the data must be available to all screens within the canvas app. You need to reduce the number of times that the app must retrieve data from the data source.

Which two data stores can you use?

Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- a) parameter
- b) global variable
- c) collection
- d) environment variable

**Answer: b, c**

**Question: 4**

You are creating an app that must support users with different disabilities. You want to make sure that your app to adhere to Microsoft's accessibility and performance guidelines.

Which of the following actions should you take?

- a) You should use the Portal Checker
- b) You should use the Solution Checker
- c) You should use the Object Detector
- d) You should use the App Checker

**Answer: d**

**Question: 5**

You document client data via a Microsoft SharePoint list. You are planning to configure a Power Automate flow that triggers a series of actions when new data is added to the list.

Which of the following actions should you take?

- a) You should use the When an item is created trigger.
- b) You should use the For a selected file trigger.
- c) You should use the When a file is classified by a content understanding model trigger.
- d) You should use the When an item is created or modified trigger.

**Answer: a**

**Question: 6**

Data loss prevention (DLP) policies are configured in your company's environment. After creating a Power Automate flow, you find that you are unable to activate the flow. You need to edit the DLP policies that are preventing the flow from activating.

Which of the following actions should you take?

- a) You should make sure that you have the Environment Admin role assigned.
- b) You should make sure that you have the Environment Maker role assigned.
- c) You should make sure that you have the System customizer role assigned.
- d) You should make sure that you have the Portal owner role assigned.

**Answer: a**

**Question: 7**

A clothing retailer is creating a Power Virtual Agents chatbot in Microsoft Teams. The chatbot will use Microsoft Dataverse for Teams to provide sales metrics by store. A user wants to be able to ask the chatbot to see all the sales for pants.

You need to configure the chatbot to provide sales data for pants even when a user enters the terms jeans, slacks, or trousers. Which chatbot component should you use?

- a) Skills.
- b) Tables.
- c) Topics.
- d) Supported languages.
- e) Entities.

**Answer: e**

**Question: 8**

You are creating a model-driven app that allows users to create and edit a list of existing accounts. You need to display a list of all active accounts. Which user interface components should you use?

- a) data table
- b) gallery
- c) view
- d) form

**Answer: c**

**Question: 9**

A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies. A Power Automate flow monitors social media channels to identify high-impact trends.

When the Power Automate flow identifies the trends, consistently formatted and standardized feedback must be collected from the channel members within Teams.

You need to streamline the Power Automate and Teams communication process. What should you use?

- a) AI Builder
- b) Common Data Service business process flows
- c) Adaptive cards
- d) Integrated approval flows

**Answer: a**

**Question: 10**

After creating an app with several screens, test users inform you that the size and type of gallery shown on every screen is different.

You decide to enhance the consistency for the app screens by creating a reusable gallery that displays data according to the current record. You start by adding a gallery control.

Which of the following is the action you should take NEXT?

- a) You should Add an input property.
- b) You should Add a screen
- c) You should create a component.
- d) You should create a form.

**Answer: c**

## Avail the Study Guide to Pass Microsoft PL-100 Power Platform App Maker Exam:

- Find out about the PL-100 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [PL-100 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the PL-100 training. Joining the Microsoft provided training for PL-100 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [PL-100 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. PL-100 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

## Career Benefits:

- Passing the PL-100 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

## Here Is the Trusted Practice Test for the PL-100 Certification

EduSum.Com is here with all the necessary details regarding the PL-100 exam. We provide authentic practice tests for the PL-100 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on EduSum.Com for rigorous, unlimited two-month attempts on the **[PL-100 practice tests](#)**, and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Microsoft Certified - Power Platform App Maker Associate.
