Discover More about the 1Z0-1072-22 Certification

Are you interested in passing the Oracle 1Z0-1072-22 exam? First discover, who benefits from the 1Z0-1072-22 certification. The 1Z0-1072-22 is suitable for a candidate if he wants to learn about Oracle Cloud Infrastructure. Passing the 1Z0-1072-22 exam earns you the Oracle Cloud Infrastructure 2022 Certified Architect Associate title.

While preparing for the 1Z0-1072-22 exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The 1Z0-1072-22 PDF contains some of the most valuable preparation tips and the details and instant access to useful 1Z0-1072-22 study materials just at one [click](#).

Oracle 1Z0-1072-22 OCI Architect Associate Certification Details:

Exam Name	Oracle Cloud Infrastructure 2022 Architect Associate
Exam Code	1Z0-1072-22
Exam Price	USD \$245 (Pricing may vary by country or by localized currency)
Duration	90 minutes
Number of Questions	55
Passing Score	65%
Format	Multiple Choice Questions (MCQ)
Recommended Training	Oracle Cloud Infrastructure 2022 Certified Architect Associate Oracle Cloud Infrastructure Learning Subscription
Schedule Exam	Pearson VUE
Sample Questions	Oracle Cloud Infrastructure 2022 Certified Architect Associate (OCA)
Recommended Practice	1Z0-1072-22 Online Practice Exam

1Z0-1072-22 Syllabus:

Compute	<ul style="list-style-type: none"> - Select appropriate compute choices - Configure compute instances - Configure Autoscaling - Describe OCI compute image options - Describe and configure OS Management - Understand Infrastructure Maintenance
Implement and manage Virtual Cloud Networks	<ul style="list-style-type: none"> - Describe public and private subnets - Describe public and private IP addresses and virtual NICs - Configure Virtual Cloud Network Routing and Gateways - Configure Security Lists and Network Security Groups
Implement and manage VCN connectivity	<ul style="list-style-type: none"> - Understand VCN connectivity options - Configure site-to-site VPN - Describe Fast connect - Configure Local and Remote Peering
Configure DNS and Traffic Management	<ul style="list-style-type: none"> - Describe Public and Private DNS zones - Configure Traffic Management
Explain Load Balancing	<ul style="list-style-type: none"> - Describe and configure a layer-7 Load Balancer - Describe and configure a layer-4 Network Load Balancer
Deploy and manage Block Storage	<ul style="list-style-type: none"> - Understand Block Volume performance tiers - Deploy Block and Boot Volumes - Configure Volume Groups, Backups, Clones - Configure cross-region replication
Configure and manage Object Storage	<ul style="list-style-type: none"> - Understand Object Storage tiers - Describe Object Storage Security - Implement Object Storage versioning, life cycle management and retention rules - Configure Multipart uploads - Understand Object Storage replication
Implement and manage File Storage	<ul style="list-style-type: none"> - Configure File Storage - Describe File Storage security - Understand File System Snapshots and Cloning - Understand File System usage and metering
Databases	<ul style="list-style-type: none"> - Introduction to Database Systems and Autonomous Databases - Database Systems and Autonomous Databases Operations and Maintenance

	<ul style="list-style-type: none"> - Monitor Databases Services - Understand External Database Service - Setting DB Timezone - Understand Database Migration
Observability and Management	<ul style="list-style-type: none"> - Understand Observability and Management platform - Configure Monitoring and set alarms - Configure Logging
Identity and Access Management	<ul style="list-style-type: none"> - Understand AuthN and AuthZ - Implement compartments - Implement conditional and advanced policies - Configure Dynamic Groups and Tag based access control
Security	<ul style="list-style-type: none"> - Understand security services - Configure Cloud Guard, Security Zone and Security Advisor (change from Data Guard) - Describe and Configure OCI Vault - Describe and Configure Bastion

Broaden Your Knowledge with Oracle 1Z0-1072-22 Sample Questions:

Question: 1

You are a network architect of an application running on Oracle Cloud Infrastructure (OCI). Your security team has informed you about a security patch that needs to be applied immediately to one of the backend web servers.

What should you do to ensure that the OCI load balancer does not forward traffic to this backend server during maintenance?

- a) Edit the security list associated with the subnet to avoid traffic connectivity to this backend server.
- b) Create another OCI load balancer for the backend web servers, which are active and handling traffic.
- c) Stop the load balancer for maintenance and restart the load balancer after the maintenance is finished.
- d) Drain all existing connections to this backend server and mark the backend web server offline.

Answer: d

Question: 2

You have a shared file system between two web servers by using file storage service (FSS) and you were tasked with creating a backup plan for this environment to protect the data placed in the shared file system.

What is the recommended approach to create this backup using FSS features?

- a) Use the rsync tool to send data from the shared file system to a boot volume.
- b) Implement a cron job to copy data from the shared file system to object storage.
- c) Use the rsync tool to send data from the shared file system to a block volume.
- d) Compress the data that is in the shared file system and copy it to a different folder on the boot volume.
- e) Implement a manual backup job to execute a snapshot of the shared file system.

Answer: e

Question: 3

A new employee has just started working for your company. You create an Oracle Cloud infrastructure user account for this employee, following which they are able to log in, but still cannot create any resources.

What should you do to resolve this?

- a) Send the employee API Signing Keys to log in.
- b) Delete the account and create another one.
- c) Make sure that the employee is logging in to the Oracle Cloud Infrastructure account from your corporate network only.
- d) Add the employee to a group with policies to grant access to relevant resources.

Answer: d

Question: 4

Which two statements are true about subnets within a VCN?

- a) You can have multiple subnets in an Availability Domain for a given VCN.
- b) Private and Public subnets cannot reside in the same Availability Domain for a given VCN.
- c) Subnets can have their IP addresses overlap with other subnets in another network for a given VCN.
- d) Instances obtain their private IP and the associated security list from their subnets.

Answer: a, d

Question: 5

What is the default backup location for database backup on database Cloud Service (DBCS)?

- a) Object Storage on Oracle Cloud Infrastructure
- b) ASM diskgroup
- c) block volume
- d) locally attached NVMe on Virtual Machine

Answer: a

Question: 6

When terminating a compute instance, which statement is true?

- a) The instance needs to be stopped first, and then terminated.
- b) All block volumes attached to the instance are terminated.
- c) Users can preserve the boot volume associated with the instance.
- d) The boot volume is always deleted.

Answer: c

Question: 7

Which two statements are true about boot volumes?

- a) You can delete the boot volume that is currently attached to an instance.
- b) You can detach a boot volume from a running instance.
- c) You can launch another instance by using an unused boot volume.
- d) You can create a backup of boot volumes.

Answer: c, d

Question: 8

Which two characteristics do you need to consider when choosing a method to migrate a database to Oracle Cloud Infrastructure?

- a) on-premises connectivity using remote and local virtual cloud network (VCN) peering
- b) on-premises database version and quantity of data, including indexes
- c) on-premises host operating system platform and network bandwidth
- d) on-premises database character set and application version

Answer: b, c

Question: 9

You have a compute instance with five 1TB block volumes attached to it and you need to create a backup of those volumes.

Which is the recommended method to ensure time-consistent backups of those volumes?

- a) Group all five volumes in a volume group and create a backup of the volume group.
- b) Clone each block volume individually.
- c) Create a script with five sequential backup Oracle Cloud Infrastructure command line interface (CLI) commands.
- d) Create a shell script to clone each volume individually.

Answer: a

Question: 10

Which resource is required when connecting to your on-premise network from your Virtual Cloud Network (VCN) via IPsec VPN or FastConnect?

- a) Internet Gateway (IGW)
- b) Dynamic Routing Gateway (DRG)
- c) local peering gateway
- d) NAT

Answer: b

Avail the Study Guide to Pass Oracle 1Z0-1072-22 OCI Architect Associate Exam:

- Find out about the 1Z0-1072-22 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [1Z0-1072-22 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the 1Z0-1072-22 training. Joining the Oracle provided training for 1Z0-1072-22 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [1Z0-1072-22 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. 1Z0-1072-22 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

Passing the 1Z0-1072-22 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the 1Z0-1072-22 Certification

DBExam.com is here with all the necessary details regarding the 1Z0-1072-22 exam. We provide authentic practice tests for the 1Z0-1072-22 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on DBExam.com for rigorous, unlimited two-month attempts on the **[1Z0-1072-22 practice tests](#)**, and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Oracle Cloud Infrastructure 2022 Certified Architect Associate.
