(Choose three.)

- a) Two additional Disk Boards (DKBs) have to be installed.
- b) Slots B of both controllers must be available for DKB installation.
- c) The SAS Expansion license has to be installed.
- d) In Shared Memory, the Extension1 has to be enabled.
- e) Drive Boxes (DBs) with SAS interface have to be added.

Answer: a, c, e

Question: 2

How are system logs and error messages utilized when troubleshooting VSP midrange storage systems?

- a) They provide real-time performance data for analysis and optimization.
- b) They help identify hardware or software issues causing system malfunctions.
- c) They offer insights into the historical usage and trends of the storage systems.
- d) They enable remote access and monitoring of the storage systems.

Answer: b

Question: 3

A customer has a VSP G370 with the encryption license key installed. They now want to have all the DP-Volumes of a certain pool located on encrypted RAID Groups. What are two requirements?

(Choose two.)

- a) The controller board must support encryption.
- b) The RAID level of RAID Groups in the pool must be RAID 6.
- c) At least 20 GB of Shared Memory must be installed.
- d) The RAID Groups in the pool must be formatted with encryption enabled.

Answer: a, d

Question: 4

What are the internal components of VSP midrange storage systems primarily responsible for?

- a) Managing user access and permissions
- b) Storing and retrieving data
- c) Ensuring data integrity and security
- d) Performing data analytics and reporting

Answer: b

Question: 5

You are installing a VSP F370 and you need to connect your laptop to one of the controllers. What are the two default IP addresses of the maintenance ports of CTL1 and CTL2?

(Choose two.)

- a) 10.0.0.17
- b) 10.0.0.16
- c) 192.168.0.17
- d) 192.168.0.16

Answer: a, b

Question: 6

How are program products enabled on VSP midrange storage systems?

- a) By downloading and installing software packages from the manufacturer's website
- b) By activating license keys provided by the manufacturer
- c) By running specific commands in the storage systems' management interface
- d) By connecting external devices to the storage systems and transferring the programs

Answer: b

Question: 7

Which back-end hardware component of VSP midrange storage systems is responsible for storing the actual data?

- a) Storage controllers
- b) Cache memory
- c) Network interface cards
- d) Disk drives

Answer: d

Question: 8

What are two consequences when a "New Installation" procedure is performed on a VSP Midrange system? (Choose two.)

- a) The SVP drive is formatted.
- b) The MPC software is updated.
- c) All the data on RAID groups is lost.
- d) The license keys are deleted.

Answer: a, c

Question: 9

You are installing a new VSP G700 and are using the Initial Setup Wizard (ISW) for the network configuration. Which set of IP addresses is configured with the ISW?

- a) IP addresses of management ports
- b) IP addresses of maintenance ports
- c) IP addresses of all the ports
- d) IP addresses of all the ports and of the SVP

Answer: a

Question: 10

When is the "New Installation" procedure for VSP midrange storage systems typically used?

- a) When upgrading the firmware of the storage systems
- b) When expanding the storage capacity of the systems
- c) When replacing an existing storage system with a new one
- d) When troubleshooting performance issues in the systems

Answer: c

Avail the Study Guide to Pass Hitachi Vantara HQT-4180 VSP Midrange Family Installation Exam:

- Find out about the HQT-4180 syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [HQT-4180 syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.

- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the HQT-4180 training. Joining the Hitachi Vantara provided training for HQT-4180 exam helps a candidate to strengthen his practical knowledge base from the certification.
- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [HQT-4180 sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. HQT-4180 practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

Passing the HQT-4180 exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the HQT-4180 Certification

NWExam.com is here with all the necessary details regarding the HQT-4180 exam. We provide authentic practice tests for the HQT-4180 exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on NWExam.com for rigorous, unlimited two-month attempts on the [HQT-4180 practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the Hitachi Vantara Qualified Professional VSP Midrange Family Installation.
