Are you interested in passing the UiPath UiARD exam? First discover, who benefits from the UiARD certification. The UiARD is suitable for a candidate if he wants to learn about RPA Developer. Passing the UiARD exam earns you the UiPath Certified Advanced RPA Developer (UiARD) title.

While preparing for the UiARD exam, many candidates struggle to get the necessary materials. But do not worry; your struggling days are over. The UiARD PDF contains some of the most valuable preparation tips and the details and instant access to useful [UiARD study materials just at one click.](#)

UiPath UiARD UiPath Advanced RPA Developer Certification Details:

Exam Name	UiPath Certified Advanced RPA Developer (UiARD)
Exam Code	UiARD
Exam Price	\$200 (USD)
Duration	120 mins
Number of Questions	90
Passing Score	70%
Schedule Exam	Pearson VUE
Sample Questions	UiPath UiARD Sample Questions
Practice Exam	UiPath UiARD Certification Practice Exam

UiPath UiARD Syllabus:

Topic	Details
UiPath Studio	<ul style="list-style-type: none"> - Identify and describe how UI Automation activities and/or Excel activities (Classic design experience) can be configured to interact with background windows - Describe how to use state machines versus flowcharts and sequences - Describe how to use and configure Activity Project Settings and Classic Libraries
UiPath Studio – Activities and Properties	<ul style="list-style-type: none"> - Identify and describe how activities are used to automate actions in Excel, e-mail, and .pdfs

Topic	Details
	<ul style="list-style-type: none"> - Differentiate between input methods in the Classic design experience - Identify and describe the key Classic UI Activities' properties; for example, ContinueOnError, DelayBefore, DelayAfter - Describe the use of various Classic UI synchronization activities; for example, Element Exists, Find Element, Find Text - Identify and apply how to extract structured data from an application in UiPath Studio using the Classic design experience - Understand how to build attended automation using the Background Process template, Studio Triggers, and Picture in Picture (PiP)
UiPath Studio – Robotic Enterprise (RE) Framework	<ul style="list-style-type: none"> - Understand how to build automation processes using the REFramework template with Orchestrator queues - Modify the REFramework to use any datatype for TransactionItem; for example, String, DataRow, etc. - Modify the REFramework template to accommodate any type of process; transactional, linear, iterative - Describe the differences between Dispatcher and Performer, how the Dispatcher is used to upload transaction items, and how the Performer is used to consume the queues and process the transactions - Differentiate between using the Settings sheet and the Assets sheet in the configuration file - Differentiate between using Application Exceptions and Business Rule Exceptions - Understand and describe the new REFramework 2021.10 features
Classic Selectors	<ul style="list-style-type: none"> - Determine and describe how robust selectors are created; for example, dynamic versus static selectors - Describe how Tags and Attributes, Dynamic Selectors, Anchor Base, etc. are used in UI Explorer to create a robust selector in the Default, Active Accessibility, or UI Automation frameworks - Describe the differences between using full selectors versus using partial selectors

Topic	Details
.NET Classes and Objects	<ul style="list-style-type: none"> - Identify how methods, activities, and the RegEx Builder are used for string manipulation and regular expressions - Describe how to work with complex data structures and data manipulation; for example, datatables, lists, dictionaries - Describe how to initialize variables such as lists and datatables, and how to filter datatables - Explain how to use the VB Invoke Code, Invoke Method, and Invoke Workflow activities and how arguments are used to pass data
Advanced Functions	<ul style="list-style-type: none"> - Identify and describe UiPath coding best practices - Understand how GIT is used for version control - Describe the functionality of the Workflow Analyzer and how to use or customize existing rules
Error Handling and Troubleshooting	<ul style="list-style-type: none"> - Identify and describe the use of the error handling activities such as Try Catch, Throw, Rethrow, Retry Scope, and Global Exception Handler - Examine and describe the activities and/or features used to troubleshoot and debug projects - Describe how to write coherent log messages (default or user-defined), how to use them to diagnose and debug a process from UiPath Studio, and analyze them in UiPath Orchestrator
Advanced Orchestrator Functions	<ul style="list-style-type: none"> - Describe how to work with Orchestrator queues and assets

Sample Questions:

Question: 1

A process, based on Robotic Enterprise (RE) Framework 2021.10, runs on Orchestrator and an error is thrown in the Initialization state in Framework\InitAllSettings.xaml. The project has the default values for the settings in Config.xlsx. What is state of the job in Orchestrator?

- a) Stopped
- b) Successful
- c) Faulted
- d) Suspended

Answer: c

Question: 2

What is a characteristic of the Final State in a State Machine?

- a) A Final State can only transition to another Final State activity
- b) Must have at least one Transition configured from the Final State
- c) A Final State contains the Transitions and the Exit sections
- d) A State must be connected to a Final State

Answer: d

Question: 3

When an unexpected error occurs at the application level in the Process.xaml file of the Robotic Enterprise (RE) Framework, which type of exception is caught by default?

- a) System.Exception
- b) System.ApplicationException
- c) System.NullReferenceException
- d) UiPath.Core.BusinessRuleException

Answer: a

Question: 4

Which activity is valid in the Condition of a Retry Scope activity?

- a) Check True
- b) Find Children
- c) On Element Appear
- d) File Exists

Answer: a

Question: 5

A developer wants to modify the Robotic Enterprise (RE) Framework to make a linear process. Based on the REFramework documentation, which action should the developer perform?

- a) Set the MaxRetryNumber to 1 in the Config.xlsx file
- b) In the GetTransactionData workflow, only assign a value to out_TransactionItem if in_TransactionNumber = 1
- c) In the GetTransactionData workflow, assign out_TransactionItem = Nothing
- d) Set the MaxRetryNumber to 0 in the Config.xlsx file

Answer: b

Question: 6

Which state and file in the Robotic Enterprise (RE) Framework is the Config.xlsx file read?

- a) State: Get Transaction Data
File: GetTransactionData.xaml
- b) State: Initialization
File: InitAllApplications.xaml
- c) State: Process Transaction
File: Process.xaml
- d) State: Initialization
File: InitAllSettings.xaml

Answer: d

Question: 7

A developer is building a process that needs to click an element which requires a mouse hover to become visible. However, the element does not appear with the default click setting. The input method for the Click activity is Hardware Events.

Which property should the developer configure to be able to click the element?

- a) CursorMotionType = Smooth
- b) CursorMotionType = Instant
- c) AlterIfDisabled = True
- d) AlterIfDisabled = False

Answer: a

Question: 8

What is an advantage of using the default Robotic Enterprise (RE) Framework template with Orchestrator queues?

- a) Always assigns a status of Successful or Abandoned to a Transaction Item
- b) Kills all applications open on the machine after a Business Rule Exception
- c) Reads from multiple queues of varying data at once
- d) Updates Failed Queue Items with the location of associated screenshots

Answer: d

Question: 9

The output variable of an Extract Structured Data activity contains company names and stock symbols. Which activity will return the company name for a specific input stock symbol?

- a) Select Item
- b) Lookup Data Table
- c) Get Row Item
- d) LookUp Range

Answer: b

Question: 10

You are working with an application that allows all types of input methods for the Type Into activity. Which property should be enabled for the fastest execution?

- a) SendWindowMessages
- b) ClickBeforeTyping
- c) SimulateType
- d) EmptyField

Answer: c

Avail the Study Guide to Pass UiPath UiARD UiPath Advanced RPA Developer Exam:

- Find out about the UiARD syllabus topics. Visiting the official site offers an idea about the exam structure and other important study resources. Going through the syllabus topics help to plan the exam in an organized manner.
- Once you are done exploring the [UiPath UiARD syllabus](#), it is time to plan for studying and covering the syllabus topics from the core. Chalk out the best plan for yourself to cover each part of the syllabus in a hassle-free manner.
- A study schedule helps you to stay calm throughout your exam preparation. It should contain your materials and thoughts like study hours, number of topics for daily studying mentioned on it. The best bet to clear the exam is to follow your schedule rigorously.
- The candidate should not miss out on the scope to learn from the [UiPath Advanced RPA Developer training](#). Joining the UiPath provided

training for this UiPath certification exam helps a candidate to strengthen his practical knowledge base from the certification.

- Learning about the probable questions and gaining knowledge regarding the exam structure helps a lot. Go through the [UiPath UiARD sample questions](#) and boost your knowledge
- Make yourself a pro through online practicing the syllabus topics. UiARD practice tests would guide you on your strengths and weaknesses regarding the syllabus topics. Through rigorous practicing, you can improve the weaker sections too. Learn well about time management during exam and become confident gradually with practice tests.

Career Benefits:

Passing the UiPath UiARD exam, helps a candidate to prosper highly in his career. Having the certification on the resume adds to the candidate's benefit and helps to get the best opportunities.

Here Is the Trusted Practice Test for the UiPath UiARD Certification

CertFun.Com is here with all the necessary details regarding the UiARD exam. We provide authentic practice tests for the UiARD exam. What do you gain from these practice tests? You get to experience the real exam-like questions made by industry experts and get a scope to improve your performance in the actual exam. Rely on CertFun.Com for rigorous, unlimited two-month attempts on the [UiARD practice tests](#), and gradually build your confidence. Rigorous practice made many aspirants successful and made their journey easy towards grabbing the UiPath Certified Advanced RPA Developer (UiARD).
