ISACA CCAK Sample Questions:

Question: 1

A cloud auditor is evaluating a cloud service provider's adherence to the Cloud Control Matrix (CCM). The auditor needs to assess various aspects of the provider's operations. What areas should the auditor examine to provide a comprehensive evaluation?
Select all that apply.

a) The CSP's policies and procedures for access control, data encryption, and incident response.
b) The aesthetic appeal of the CSP's user interface to ensure it meets industry design standards.
c) The effectiveness of the CSP's change management process and how well it is integrated with incident and problem management.
d) The transparency of the CSP's data processing locations and data transfer mechanisms to assess compliance with data sovereignty laws.

Answer: a, c, d

Question: 2

How does a Threat Analysis Methodology utilizing CCM aid in cloud security?

a) It provides a systematic approach to identify and mitigate potential cloud security threats.
b) It evaluates the creativity of cloud threat warnings.
c) It assesses the impact of cloud threats on social media trends.
c) It measures the cloud provider's ability to create engaging threat reports.

Answer: a

Question: 3

When evaluating a cloud compliance program, it is crucial to assess the program's effectiveness in enforcing and maintaining compliance standards. What factors should be considered in such an evaluation?

Select all that apply.

a) The frequency and thoroughness of compliance audits and assessments.
b) The involvement of senior management and stakeholders in supporting and understanding the compliance program.
c) The presence of an attractive and user-friendly compliance training program, regardless of its content or relevance to cloud compliance.
d) The procedures in place for identifying, reporting, and addressing compliance violations or gaps.

Answer: a, b, d

Question: 4

Effective cloud governance frameworks often include what elements?

(Choose two)

a) Social media integration strategies
b) Mechanisms for policy enforcement
c) Strategies for engaging with influencers
d) Performance and compliance monitoring

Answer: b, d

Question: 5

What are key considerations when establishing a Cloud Governance framework?

(Choose two)

a) Selecting colors for the user interface
b) Defining clear roles and responsibilities
c) Establishing performance and reliability metrics
d) Ensuring the framework is visually appealing

Answer: b, c

Question: 6

In Cloud Governance, which component is crucial for aligning IT resources with business objectives?

- a) Developing a robust marketing strategy
- b) Implementing effective cost management
- c) Creating graphical content
- d) Ensuring entertainment of stakeholders

Answer: b

Question: 7

Which statement best describes the purpose of cloud governance within an organization?

- a) To limit the use of cloud services to non-essential applications
- b) To ensure efficient use of cloud resources without regard to compliance
- c) To govern the use of cloud services in alignment with organizational goals and policies
- d) To prioritize the aesthetic aspects of cloud solutions over their functionality

Answer: c

Question: 8

What is an essential factor to consider when evaluating the effectiveness of a Cloud Compliance Program?

- a) The attractiveness of the cloud provider's website.
- b) The number of data centers the cloud provider possesses.
- c) The alignment of the program with organizational compliance requirements.
- d) The variety of colors used in the cloud provider's dashboard.

Answer: c

Question: 9

Why is it important to understand the shared responsibility model in cloud computing?

- a) To evaluate the parties based on their contribution to cloud service entertainment.
- b) To assess which party has the best cloud-related social media presence.
- c) To determine which party enjoys the most benefits from cloud services.
- d) To clarify the security responsibilities of the cloud provider and the customer.

Answer: d

Question: 10

Which of the following is a key benefit of using a continuous monitoring approach in cloud auditing?

    a) It allows for real-time detection of security incidents and breaches.
    b) It eliminates the need for manual audit reviews and assessments.
    c) It provides assurance that all cloud controls and configurations are up-to-date.
    d) It enables auditors to conduct thorough penetration tests on cloud systems.

Answer: a
