Know Your HQT-6711 Certification Well:

The HQT-6711 is best suitable for candidates who want to gain knowledge in the Hitachi Vantara Administration. Before you start your HQT-6711 preparation you may struggle to get all the crucial Ops Center Protection materials like HQT-6711 syllabus, sample questions, study guide.

But don't worry the HQT-6711 PDF is here to help you prepare in a stress free manner.

The PDF is a combination of all **your queries like**-
- What is in the HQT-6711 syllabus?
- How many questions are there in the HQT-6711 exam?
- Which Practice test would help me to pass the HQT-6711 exam at the first attempt?

Passing the HQT-6711 exam makes you Hitachi Vantara Qualified Professional - Hitachi Ops Center Protection. Having the Ops Center Protection certification opens multiple opportunities for you. You can grab a new job, get a higher salary or simply get recognition within your current organization.

Hitachi Vantara HQT-6711 Ops Center Protection Certification Details:

Exam Name	Ops Center Protection Professional
Exam Code	HQT-6711
Exam Price	$100 USD
Duration	60 minutes
Number of Questions	35
Passing Score	65%
Recommended Training	TSI2995 Managing Data Protection with Hitachi Ops Center Protector (3-day ILT/vILT)
Exam Registration	**Kryterion Webassessor**
Sample Questions	**Hitachi Vantara HQT-6711 Sample Questions**

Practice Exam	**Hitachi Vantara Qualified Professional - Hitachi Ops Center Protection Practice Test**

HQT-6711 Syllabus:

Section	Objectives
Data protection overview	- Describe the data protection concepts. - Describe Recovery Point Objective and Recovery Time Objective. - Describe the Hitachi Ops Center Protector features and functionality.
Data protection components	- Describe the Hitachi Ops Center Protector software architecture. - Describe nodes characteristics. - Describe how to define policies. - Describe how to create and monitor data flows.
Block storage-based data protection	- Describe Hitachi Ops Center Protector capabilities for block storage arrays. - Describe the Hitachi replication solutions. - Describe the requirements for block-based data protection. - Describe how to configure storage-based data protection.
File-based data protection	- Describe Hitachi Ops Center Protector capabilities for file-based protection - Identify steps for creating host nodes using Hitachi Ops Center Protector. - Describe generation repositories.
Application-based data protection	- Describe Hitachi Ops Center Protector capabilities for VMware protection. - Describe how to create nodes, policies and data flows for VMware protection. - Describe Hitachi Ops Center Protector capabilities for Oracle protection.
Cloud Backup	- Describe Hitachi Ops Center Protector capabilities for Hitachi Content Platform private cloud backups. - Describe the concept of Unified Backup Infrastructure (UBI). - Describe Hitachi Ops Center Protector capabilities for Amazon S3 cloud backups.
Administration and Maintenance	- Describe Role-Based Access Control (RBAC). - Describe how to create reports and define notifications. - Explain how to backup Hitachi Ops Center Protector.

Section	Objectives
	- Describe how Hitachi Ops Center Protector collects diagnostic information
REST API	- Describe Hitachi Ops Center Protector REST API concepts.

Hitachi Vantara HQT-6711 Sample Questions:

Question: 1

Which of the following are considered core data protection concepts?

(Select three)

a) Data Lifecycle Management
b) Data Encryption
c) Data Quality
d) Data Redundancy
e) Data Minimization

Answer: a, b, d

Question: 2

How can Hitachi Ops Center Protector's backup functionality be enhanced? (Choose Two)

a) Integrating with cloud storage solutions
b) Enabling real-time synchronization
c) Regularly testing backup integrity
d) Increasing the compression of backup files

Answer: a, c

Question: 3

To create a host node in Hitachi Ops Center Protector, the first step is to _____.

a) assign a static IP address
b) select the host group
c) define the node type
d) install the software agent

Answer: d

Question: 4

Which capabilities does Hitachi Ops Center Protector offer for Amazon S3 cloud backups?
(Choose Three)

    a) Automated conversion of backup data to S3 compatible format
    b) Encryption of data before it is uploaded to S3
    c) Seamless integration with S3 standard, IA, and Glacier storage classes
    d) Real-time replication to multiple S3 buckets
    e) Data lifecycle management based on organizational policies

Answer: b, c, e

Question: 5

In the context of Hitachi Ops Center Protector, what characteristic is true about a node?
(Choose Two)

    a) Nodes can operate independently of each other
    b) Nodes can be dynamically added or removed without significant downtime
    c) Each node requires manual configuration and setup
    d) Nodes are interdependent and require manual synchronization

Answer: a, b

Question: 6

Describe the impact of effective node configuration in the Ops Center Protector system.

    a) Enhances system scalability and flexibility
    b) Limits the system's ability to recover from failures
    c) Decreases overall system performance
    d) Increases operational costs

Answer: a

Question: 7

What is the benefit of integrating Hitachi Ops Center Protector with VMware's vSphere API?

    a) It simplifies the management of physical VMware ESXi servers.
    b) It enhances the automation of snapshot and replication processes.
    c) It provides better security for data at rest.
    d) It allows for the direct modification of virtual machine files.

Answer: b

Question: 8

When setting up host nodes, after installing the software agent, the next step involves _____ the node to a protection policy.

- a) encrypting
- b) linking
- c) synchronizing
- d) auditing

Answer: b

Question: 9

When configuring storage-based data protection, what is the importance of zoning in SAN environments?

- a) It isolates network traffic to enhance performance
- b) It encrypts data passing through the network
- c) It provides a backup power source
- d) It manages user permissions and access

Answer: a

Question: 10

Generation repositories are important in data protection because they allow for _____ of older file versions.

- a) encryption
- b) deletion
- c) recovery
- d) compression

Answer: c

Study Guide to Crack Hitachi Vantara Ops Center Protection HQT-6711 Exam:

- Getting details of the HQT-6711 syllabus, is the first step of a study plan. This pdf is going to be of ultimate help. Completion of the syllabus is must to pass the HQT-6711 exam.
- Making a schedule is vital. A structured method of preparation leads to success. A candidate must plan his schedule and follow it rigorously to attain success.
- Joining the Hitachi Vantara provided training for HQT-6711 exam could be of much help. If there is specific training for the exam, you can discover it from the link above.
- Read from the HQT-6711 sample questions to gain your idea about the actual exam questions. In this PDF useful sample questions are provided to make your exam preparation easy.
- Practicing on HQT-6711 practice tests is must. Continuous practice will make you an expert in all syllabus areas.

Reliable Online Practice Test for HQT-6711 Certification

Make NWExam.com your best friend during your Ops Center Protection Professional exam preparation. We provide authentic practice tests for the HQT-6711 exam. Experts design these online practice tests, so we can offer you an exclusive experience of taking the actual HQT-6711 exam. We guarantee you 100% success in your first exam attempt if you continue practicing regularly. Don't bother if you don't get 100% marks in initial practice exam attempts. Just utilize the result section to know your strengths and weaknesses and prepare according to that until you get 100% with our practice tests. Our evaluation makes you confident, and you can score high in the HQT-6711 exam.
