Practice Exam	<u>Adobe AD0-E902 Certification Practice Exam</u>

AD0-E902 Syllabus:

Topic	Details	Weights
Foundational technical concepts	<ul style="list-style-type: none"> - Given a Fusion scenario with one field format that needs to be in another field format, provide the possible functions that could be used to transform the data correctly - Given a Fusion scenario that requires a function to be nested inside another function, select the properly formed expression - Identify ways to use teams to control access to connections and other Fusion features - Given a Fusion scenario, identify system and feature limitations - Given a Fusion scenario that requires timezone manipulation, distinguish between the user, visible organization, and where overriding the timezone is needed - Given a Fusion scenario, select the appropriate Workfront module(s) or action(s) - Given a Fusion scenario, select the Mapping Panel expression and/or module(s) that would appropriately transform input data to output data - Identify the correct way(s) to utilize the Fusion Dev Tool to troubleshoot errors in execution or determine calls and responses made to third-party systems - Given a Fusion scenario where data in one path is needed in another path, provide a set-get solution for making that data available on additional routing paths - Identify the ways to use or produce a Fusion template for a business need - Given a Fusion scenario, identify what to do to view executions and/or resolve errors - Identify the different options in the Fusion scenario settings to address scenario needs - Given a Fusion scenario, select the appropriate flow control and/or determine the correct combination of flow control module(s) 	39%
Scenario design and architecture	<ul style="list-style-type: none"> - Given a list of steps, choose the correct sequence to parse JSON and convert to 	35%

Topic	Details	Weights
	<p>bundles</p> <ul style="list-style-type: none"> - Given a set of requirements, identify the correct data look up method - Identify differences between instant and scheduled triggers - Identify a correct module for uploading a document to Workfront - Given a business requirement, identify the correct approach to track that Fusion processed a record (not a user) and when - Given a Fusion scenario, identify an opportunity to simplify the design and/or optimize for maintenance - Identify Fusion best practices for documenting scenarios - Given a situation, identify an opportunity to reduce data flow through a scenario - Given an example of the number of bundles shown on a search module and a following aggregator, explain the changes in the number of operations processed and displayed by the bundle inspector - Identify information that is found in the bundle inspector - Given a description of a need to archive a scenario for longer than 60 days and select the only possible way (import/export blueprint) - Given an example of an Error 403: Forbidden, correctly select the origin of the error message and cause 	
Testing and error handling	<ul style="list-style-type: none"> - Identify the elements of a test plan - Identify the elements of a test case - Given a Fusion scenario, correctly identify the appropriate directive to handle an unreliable service - Identify the process to add custom error handling in a Fusion scenario - Identify how to track, read, and resolve incomplete executions - Given a Fusion scenario with missing required data, select ways to handle the invalid data 	16%

Topic	Details	Weights
Working with APIs	<ul style="list-style-type: none"> - Given a third-party API that returns a 429: Too Many Requests, identify a solution to prevent or handle the error - Given a Fusion scenario where new functionality is not available in the Workfront module, identify the correct reference and module type to use the new functionality - Given a third-party system that does not have a dedicated app, identify the HTTP app and select the appropriate module - Identify the difference between CRUD operations and other common capabilities of REST APIs 	10%

Adobe AD0-E902 Sample Questions:

Question: 1

During developing an Adobe Fusion scenario, a practitioner has been asked to apply directives to handle potential unreliable services. Which two directives would be applied? (Choose two.)

- a) Rollback
- b) Resume
- c) Continue
- d) Execute

Answer: a, b

Question: 2

What occurs if the 'Stop processing after an empty aggregation' option is enabled when no bundles reach the Aggregator module?

- a) The Aggregator module will produce an output bundle in this case and the flow will stop.
- b) The Aggregator module will not produce any output bundles in this case but the flow will not be stopped.
- c) The Aggregator module will not produce any output bundles in this case and the flow will stop.
- d) The Aggregator module will pause the flow and wait for new bundles to be added.

Answer: c

Question: 3

An Adobe Fusion developer needs to update only two Adobe Workfront task fields using a Custom API Call. Based on this premise, which URL and Method would the developer use?

- a) METHOD: PUT
URL: TASK/[Task ID]
- b) METHOD: PUT
URL: TASK/update
- c) METHOD: POST
URL: TASK/[Task ID]
- d) METHOD: DELETE
URL: TASK/[Task ID]

Answer: a**Question: 4**

The output of a search module contains 100 bundles. How many operation(s) does the Aggregator module need to perform to provide the output?

- a) 100
- b) 1
- c) 0
- d) 200

Answer: b**Question: 5**

Which two would be considered to ensure testing is consistent and captures all essential elements? (Choose two.)

- a) Output data needed just in Adobe Workfront Fusion.
- b) Input data needed just in Adobe Workfront Fusion.
- c) The ways in which users may interact with the automations and the wide range of possible data that will be processed.
- d) The test data that is needed based on requirements.

Answer: c, d

Question: 6

Which two Adobe Workfront Modules can be used to SEARCH for a specific Project?

(Choose two.)

- a) Watch Event Trigger
- b) Search Module
- c) Miscellaneous Action (Misc Action)
- d) Custom API Call

Answer: b, d

Question: 7

An administrator of an Adobe Fusion instance needs to create a new environment for a new client. This client is very strict regarding data privacy and who has access to this information.

What should the administrator do to ensure that customer privacy is maintained?

- a) Create a new team in the Adobe Fusion instance and give access only to the developers in charge of the new client and give them access as 'Member' of the team.
- b) Create a scenario with the client's name so that other members of the organization know which client the scenario belongs to.
- c) Create a new team in the Adobe Fusion instance and give access to all users in the organization as 'Admin' of the team.
- d) Add the client's scenarios to the general organization team and set the privacy flag.

Answer: a

Question: 8

If there is an error in a scenario with an instant trigger, with no error handling, what will occur?

- a) It creates an error ticket in Adobe Workfront.
- b) It keeps on running and processing the next transaction in queue.
- c) It stops immediately.
- d) The scenario will retry the failed transaction automatically.

Answer: c

Question: 9

What are two approaches to create an effective test case? (Choose two.)

- a) Determine the right design for high performance.
- b) Do not challenge the assumptions of stakeholders.
- c) Identify multiple use cases for the scenario.
- d) Identify a specific use case for the scenario.

Answer: a, d

Question: 10
